

Allied manufactures a complete line of pre-mixed, high quality mortars for various applications. These proprietary mortars are designed for use with insulating fire brick, super-duty, and high alumina bricks. Allied also supplies wash and veneer to extend refractory campaigns and contribute to the ease of cleaning vessels.

Product advantages

- Consistent workability
- Excellent performance
- High heat resistance

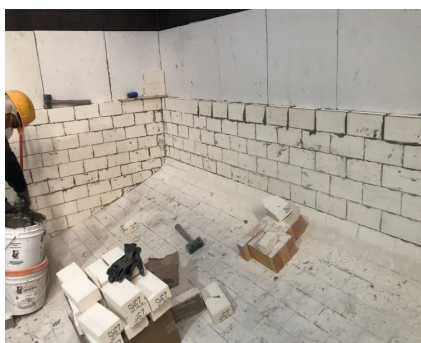

Mortar	Information	Al ₂ O ₃	Packaging
DURATAB MORTAR	Phosphate bonded, high alumina, heat set mortar	88%	25 kg (55 lb)
DURATAB C MORTAR	Phosphate bonded, (heat set) mortar with 10% chrome addition	79%	25 kg (55 lb)
BRIKSET 85 TC	Bauxite-based, high alumina, air-set mortar used in general application with high alumina brick	80%	25 kg (55 lb)
BRIKSET 65 TC	Mullite-based, air-set mortar used in general applications with high alumina brick	65%	25 kg (55 lb)
BRIKSET 40 TC	Fireclay-based, air set mortar used in general applications with super duty and high alumina brick	40%	25 kg (55 lb)

Wash/Veneer	Information	Al ₂ O ₃	Packaging*
MATRIKOTE 90 AC	Aluminum resistant coating material designed for use as a thin coating application over hot or cold surfaces. Add water to alter consistency.	90%	25 kg (55 lb)
LADLE WELL	Fine-grain, silica-based, graphitic veneering mix	11%	25 kg (55 lb)

*Product is premixed and supplied in pails
